Pavan Duggal Associates

International Agentic AI Accountability and Liability Summit 2026

Prof. G.S. Bajpai

Addressed at the 'International Conference on Cyberlaw, Cybercrime & Cybersecurity' on November 25, 2026

Prof. G.S. Bajpai participated as a distinguished panelist at the International Conference on Cyberlaw, Cybercrime & Cybersecurity, held on November 25, 2026, and organised by Pavan Duggal Associates. The conference was convened around the theme, '*Converging Futures: Cybersecurity, Cybercrime and AI in the Autonomous Era*', bringing together leading experts to deliberate on the emerging legal, technological and policy challenges arising from rapid advancements in artificial intelligence and autonomous technologies.

> Prof. Bajpai participated in a panel discussion titled
>
> **'Who Answers – Accountability when an Autonomous Agent Acts: Allocation of Responsibility across Developer, Deployer, Operator and User; Boards, Insurers and Regulators: Who Carries the Loss?'**

The discussion focused on the evolving questions of legal accountability and responsibility in an increasingly autonomous digital environment. Key issues included the allocation of liability among developers, deployers, operators and users of autonomous systems, the challenges of establishing responsibility when AI-driven systems cause harm, and the emerging roles of corporate boards, insurers and regulatory authorities in addressing risks and losses associated with autonomous decision-making.

The conference brought together policymakers, members of the judiciary, law enforcement officials, academicians, technologists and representatives of international organisations.
